ABOUT ME

I am a **Full-Stack Developer** with 4+ years of experience, specializing in **NodeJs**, **Python** and **java** to build scalable and high-performance applications. I bring strong expertise in the **MERN Stack** (MongoDB, Express.js, **React**, Node.js) and **Django**, delivering robust, modern, and efficient solutions across diverse domains. Alongside these, I am skilled in **Next.js**, **Nest.js** and **React Native**, with proven hands-on experience in **AWS cloud** deployment for scalable architectures.

EDUCATION

B.Sc. in Mathematics | Adilabad, Telangana, India | 2019-2022

SKILLS

Programming Languages

Python | Java | Node.js | JavaScript | TypeScript | GoLang | SQL / PL-SQL | NoSQL |
C language

Backend Frameworks & Technologies

Spring Boot (Java) | Django (Python) | Flask (Python) | FastAPI (Python) | NestJS (Node.js) |
Serverless Framework | AWS SAM (Serverless Application Model – Python)

Frontend Frameworks & Libraries

HTML | CSS | React Js | Next.js | Next.js | Tailwind CSS |
TanStack Query (React Query)

Cross-Platform (Mobile & Desktop) : React Native | Electron.js

Databases & ORMs

Databases

MongoDB | Elasticsearch | SQL/PL-SQL | Redis (Caching & Message Queues)

ORM / Query Tools

TypeORM | Sequelize (ORM) | JPA (ORM) | GORM

AI, ML & Modern AI Frameworks

OpenAI Agentic AI Framework | AI Integrations (with/without Agentic Frameworks) |
RAG (Retrieval-Augmented Generation) | Numpy | Pandas

Cloud & DevOps

Linux | AWS Cloud | Docker | Git | GitHub, | CI/CD(Jenkins and github actions)

Real-time & Streaming Technologies

WebSockets | SSE (Server-Sent Events)

WORK EXPERIENCE

Sr Nodejs Developer | ideyalabs | June 2026– Present

- Developing and maintaining the Tenna fleet management platform by building Single-SPA micro-frontend modules for the Job Accounting system and developing scalable backend services using Node.js and TypeScript with REST APIs and secure integrations

Full-Stack Developer | N Labs.ai | Aug 2023– May 2026

- Full stack development of AI-powered SaaS platforms, leveraging Java and Spring Boot, Node.js, Nest.js, Golang for robust backend services, integrating with Next.js, Node.js, TypeScript, and AWS Lambda.
- Optimized Java-based APIs for performance, implementing real-time features like chat and messaging with secure authentication using Spring Security.
- Managed cloud deployments on AWS and Azure, utilizing Java Hibernate with Elasticsearch and MongoDB for scalable data handling.

Frontend Developer | Bluehub IT Services Pvt.Ltd | Mar 2022 – Jul 2023

Developed scalable and user-friendly React.js applications, including e-commerce, inventory, and customer feedback systems like ClearBiz, with optimized UI/UX, real-time updates, and secure API integrations.

PROJECTS

Upadhi.ai

SaaS Job Platform

- Developed a MERN, java spring boot, golang Stack MicroService application with AI-powered candidate scoring, job search, and resume builder using Next.js, Node.js, and AWS Lambda.
- Implemented real-time chat and SEO optimization.
- **Technologies:** Next.js, Node.js, AWS Lambda, Python, Elasticsearch, MongoDB, React Native, Golang, Spring boot,

Dhyeya.ai

SaaS Learning Platform

- Built a scalable platform with Next.js, TypeScript, and Node.js, optimizing UI/UX and API performance.
- Worked on backend integration of HLS (HTTP Live Streaming) to enable seamless video delivery and playback.
- Added Swagger API documentation and implemented detailed logging for better maintainability.
- **Technologies:** Next.js, TypeScript, Node.js, HLS, Nest.js.

ITSM Ticketing Tool

IT Service Management Platform

- Built a robust IT Service Management platform with Golang backend and Next.js frontend, enabling seamless ticket lifecycle management (incident, problem, and change).
- Integrated PostgreSQL for reliable data storage and optimized query performance.
- Enhanced user experience with real-time notifications and role-based access controls.
- **Technologies:** Golang, Next.js, PostgreSQL.
- IT Service Management Platform

n-xtract.ai

SaaS Document Processing Platform

- Developed an AI-driven document extraction platform with dynamic flow creation and customizable document schemas. Implemented automated schema-based data extraction using AI, enabling seamless integration with Google Drive, PostgreSQL, SAP, and other external systems. Built real-time data processing using Server-Sent Events (SSE) and ensured scalable backend workflows.
- **Technologies:** Next.js, TypeScript, TailwindCSS, TanStack Query, Django, PostgreSQL, SSE, AI-based extraction (OpenAI Agent SDK).

n-labs.ai

Corporate Website

- Built a fast, SEO-optimized static website with Next.js for n-labs.ai, featuring responsive UI, modular components, and CMS-driven content.

Technologies: Next.js, TypeScript, Tailwind CSS, G-SAP, Framer motion.

Stellar App (Mobile App | Nodejs Backend)

axiometric pvt ltd (freelance)

- A comprehensive school management solution built on scalable Node.js, offering dedicated logins for Admins, Teachers, and Students to manage academics, attendance, exams, and performance reports. It includes JWT authentication, role-based access control, Swagger documentation, and database migrations for a secure and streamlined workflow.
- **Technologies:** React Native, Tailwindcss, Tankstack Query, Express Js, Swagger Api docs, Sequelize ORM.

RightFit – AI-Powered Recruitment Platform

- Developed an AI-driven end-to-end recruitment system enabling bulk resume upload, automated candidate profiling, and intelligent job matching. Integrated Mistral-based OCR to extract structured data from resumes and map candidates to relevant job openings. Implemented AI fit scoring and insights using Claude, Groq, and GPT-based models for candidate evaluation and recommendations.
- Built complete hiring workflows with role-based access (Requestor, HR, Hiring Manager, Department Head, Recruiter), covering screening, interview tracking, offer management, and onboarding. Integrated with SAP SuccessFactors via SAP CPI for job creation and candidate data synchronization.
- **Technologies:** Node.js, TypeScript, React/Next.js, AWS, Mistral OCR, GenAI (Claude, Groq, GPT OSS), MongoDB/Elasticsearch, REST APIs.
- **GithubLink:** Private / Enterprise Project

AI Recruitment & Hiring Automation System
